

**PeopleLink™**

Telepresence & HD Video Conferencing ISO 9001:2008 Certified

# Video Conferencing Software & Solution

Choose the best Video Conferencing Solution at the lowest price

# 10 reasons to choose Video Conferencing

Digital Waves IT Solutions (DWITS) offers 'PeopleLink' - HD Video Conference Solutions

1

**Most Advanced & Future Ready Technology with Dynamic Intelligent Bandwidth & resource allocation**

State of the Art Next Gen Compression Technology using H.264 VBR/CBR allowing you to do Quality Video Conference even at Lower bandwidth ranging from 60-128Kbps thus saving your 80% Recurring cost on bandwidth. With PeopleLink Video Conferencing supports all networks including IP networks- broadband & wireless data cards as well. With PeopleLink's Intelligent bandwidth allocation, each location in a PeopleLink conference experiences the best quality their connection will allow so that someone connecting via wireless in an airport does not dictate the quality for the other meeting endpoints such as an HD room system.

2

**FREE UNLIMITED CLIENT LICENSES - Make your every Employee/ Customer and Partner's worldwide video conference ready.**

PeopleLink works on Concurrent Licenses Model. The client Software required for Video Conference is Free of Cost and Unlimited in Number. So even if you buy as low as 5 user's, you can connect more than 1000 locations and Make your every Employee/Customer and Partner's worldwide video conference ready. ( with any 5 locations connected at the same time with a 5 user license)

3

**Side Line Users with Duplex Audio**

PeopleLink understands the core needs of Variety of Customers, Once a Month CEO/ MD wants to connect all branch offices ( 100's) of them at the same time but it becomes financially not viable to buy 100 port MCU for once a while requirement, So PeopleLink offers a license which will enable the 2<sup>nd</sup> tier branch offices to connect the Live VC Seccession at a 1/6<sup>th</sup> of the cost of full license, but the access to only see (Video, data) from the Full user logins and they can only have Talking, chatting, Polling and evaluation access. ( This is also very suitable for conducting Multilocation Live Classroom environment)

# 10 reasons to choose PeopleLink

## HD Video Conference & TelePresence Solutions

4

**TelePresence Quality over the Internet with upto 16 different Displays.**

One Single Solution which has the Highest Level of Scalability and Upgradeability (Right from Standard Definition Video Conferencing to Full High Definition 1080p. The Same Solution is Scalable to High End Tele-Presence which allows you to see 16 Full Screen Videos of 16 Different Locations on 16 Displays.

5

**Works on Hardware & Devices you already own**

Use your existing Windows based desktop or laptop computers you already have deployed. Just a simple download and anyone is ready to have HD-quality, face-to-face conversations with colleagues from an office, home or anywhere without the burden or expense of an additional device. Turn any standard conference room into a telepresence quality video communication room with PeopleLink. Just a speakerphone, camera and single or dual screens combined with PeopleLink VC is enough for HD face-to-face videoconferencing.

6

**Value add to your existing Video Conference equipments**

Investment with PeopleLink is an always SAFE investment. With our inbuilt H.323 module, you can connect to your existing hardware based VC equipments into the same conference, without the need of discarding the old VC equipments.

7

**InBuilt MCU with HotStandBy**

No need to spend extra in buying separate MCUs, PeopleLink VCs inbuilt MCU allows you to expand no of Locations to be simultaneously connected to any number ( from 2-1000 Locations). Hot Standby Optional Module allows you to have another Virtual MCU ready for backup within fraction of seconds in case the main MCU fails.

# 10 reasons to choose PeopleLink

## HD Video Conference & TelePresence Solutions

8

**Upgrade Simultaneous locations from 2 to 1000 in Multiples of 1**

PeopleLink doesn't restrict you to upgrade your additional locations ( MCU Ports) in multiples of 5 or 10. You can upgrade in multiples of 1 as per your requirement.

9

**Video Conference on the MOVE – Connect Anyone-Anywhere**

Doesn't require a Static IP for each connecting Location, Just need one STATIC IP at central Location. So your Directors, Senior Management & clients can join the VC Meetings even while travelling as well as from International locations.

10

**ALL in ONE Solution – plus INBUILT RECORDING**

Inbuilt Multiparty Video Conference, Data Conference- share PowerPoint, Word, Excel, PDF Etc, Along with Movie Files and all types of Applications including Desktop and Inbuilt Video Recording, Polling, Live Evaluation with Excel export option.
